

Patch Release 2.1.3.365 (Released 4/2/2010)

Purpose of the Patch was to address the following bugs:

- #588 – 2.1.3 Volunteer Count is off on Volunteer Grid.
- #589 – 2.1.3 Move Registrant is failing with multiple fees attached.

Volunteer Count is off on Volunteer Grid

The volunteer grid report was displaying the wrong number count that included those volunteer registrations that have not completed the registration process. These volunteer opportunities did not display on the grid giving the illusion that some items may be missing. We address this issue to ensure that the grid count does not include items that have not been processed.

Move Registrant is failing with multiple fees attached

The ability to move a registrant from one program to another was not working correctly when multiple fees were attached to the program. This issue was addressed, which now allows you to move a registrant from one program to another.
