

## Patch Release 2.1.2.328\_20100115 (Released 1/15/2010)

Purpose of the Patch was to address the following:

- Global Style Sheet changes affecting IE8
- Web Admin view in the My Account area will now display Company Name if present
- Web Admin 'Email Registrants' link can now be configured to send the email through Rainier Software's email infrastructure.

### Global Style Sheet changes affecting IE8

Global Style Sheet change has been pushed that will properly display form fields and their labels in IE8.

Company/Organization Name \*

Title

\* First Name      \* Last Name

\* Email      \* Confirm Email

Street 1 \*

Street 2

City \*      WA State \*

Zip \*      United States Country \*

\* Contact Phone (e.g., 206-555-1234)

Figure 1.1: Before the change these fields looked like this in IE8

Company/Organization Name \*

Title

First Name \*      Last Name \*

Email \*      Confirm Email \*

Street 1 \*

Street 2

City \*      State \*  
WA

Zip \*      Country \*  
United States

Contact Phone (e.g., 206-555-1234) \*

Figure 1.2: New look after revision

## **Web Admin View**

Prior to this release when logged in into the website as a Web Administrator, if company name was a collected, this field did not display on the registrant data. We have now adjusted this web administrator view to display the company name when present.

## **We Admin 'Email Registrant'**

Prior to this release when logged in into the website as a Web Administrator if you attempted to e-mail all registrants in that program, this would require using your local e-mail client. This new feature can now be configured to allow a Web Administrator to 'E-mail All Registrants' using the web link through our Rainier Software's email infrastructure. This means you can track the communications sent to program participants in the Rainier Desktop.

The configuration change must be requested so please contact [help@rainiersoftware.com](mailto:help@rainiersoftware.com) if you would like to activate this new feature.
