

Patch Release 2.1.3.370 (Released 5/19/2010)

Purpose of the Patch was to address the following bug:

- Renewal membership not enforced to register for a program when the Program/membership comparison date is set to **'None'**. When Program/membership comparison date is set to **'Start Date'** the functionality works correctly (see figure 1.1 below).

Settings Rainier Config	
Medical Release Calendar Display	
Account	
Address

Membership Valid Only on Payment	True
Program/membership comparison date	None
Renewal Days	30
Show Private Directory	True
Show Public Directory	True

Figure 1.1: Membership Setting “Program/Membership Comparison Date = None”

Membership Issue

When registering for program that requires a membership, if the registrant selected “Yes, I already have a membership” and there was a membership that needed to be renewed, Rainier did not enforce membership requirements to continue the registration (see figure 2.1, 2.2 & 2.3 below). This potentially allowed people to register for a program that requires memberships

and not having to renew the new membership. We have now addressed the membership issue which now enforces having an active membership to continue registering for a program that requires a membership (see figure 2.4 & 2.5 below).

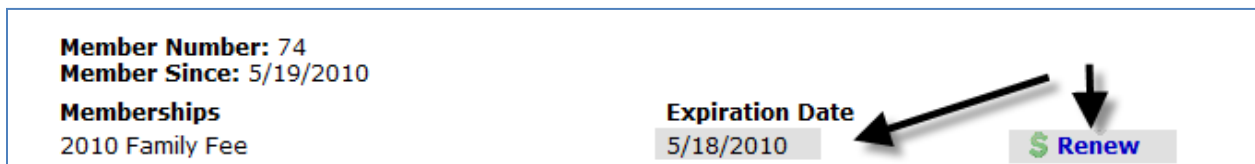

Figure 2.2: Renew Membership

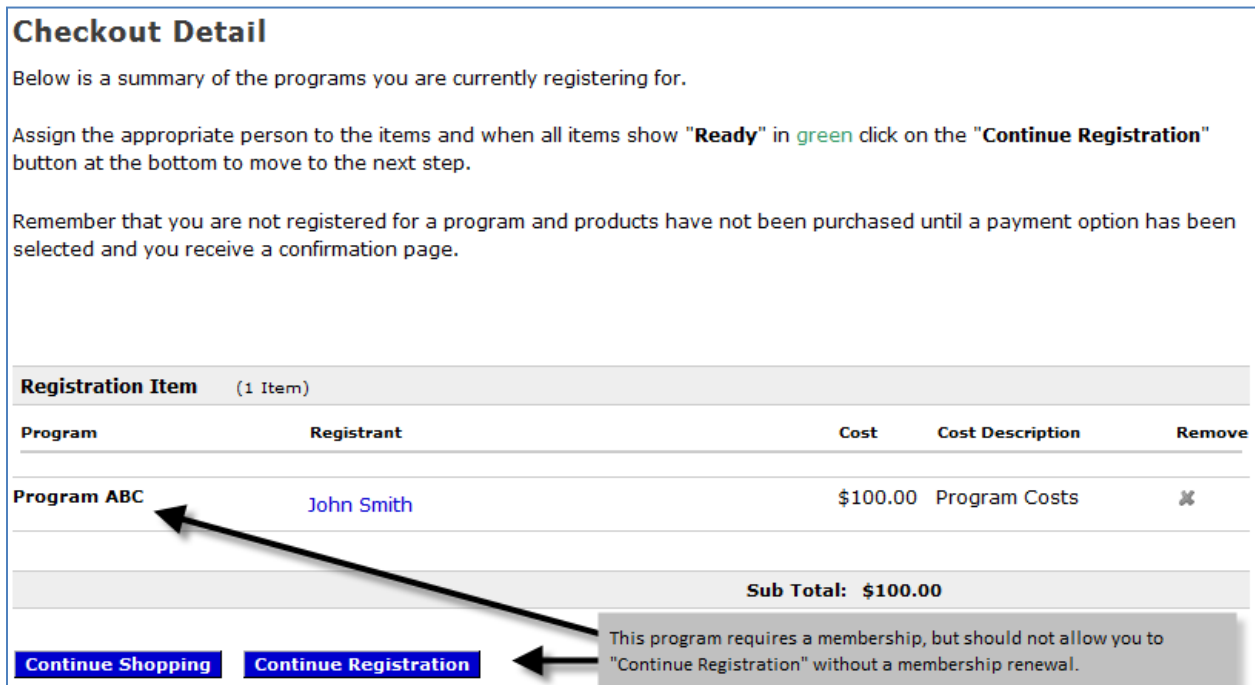

Figure 2.3: Membership not required to registration – before fix

Checkout Detail

Below is a summary of the programs you are currently registering for.

Assign the appropriate person to the items and when all items show "Ready" in green click on the "Continue Registration" button at the bottom to move to the next step.

Remember that you are not registered for a program and products have not been purchased until a payment option has been selected and you receive a confirmation page.

Registration Item (1 Item)				
Program	Registrant	Cost	Cost Description	Remove
Program ABC	Click Here	\$100.00	Program Costs	
Membership is required	Add a Membership			
Sub Total: \$100.00				
Continue Shopping Continue Registration
